

# WOCA Maintenance Box

- for the maintenance of lacquered surfaces

Preparing today for tomorrow

for  
lacquered  
surfaces

## How to do...

Lacquered floors should be regularly maintained - normally once a year, but more often when it comes to floors exposed to extremely hard wear.

- 1 Mix Wood Cleaner with water in the ratio 1:10. Wash the floor thoroughly till the surface is completely clean. The floor must be absolutely dry before application of Lacquer Care.
- 2 Apply a thin coat of the concentrated Lacquer Care. If dirty, rinse the cloth/mop in clear water and wring it hard. Continue the application. Do not continue application of Lacquer Care when the floor has started to dry. Leave the surface to dry for approx. 30 minutes.

### Regular cleaning

The regular cleaning of lacquered surfaces may be done with Lacquer Soap.

Mix 125 ml Lacquer Soap with 5 litre water for the regular cleaning. Wash the floor lengthwise. It is recommend-able to work with two buckets - one with rinse water for the wringing out of the mop and another one with the soap solution.

It is recommendable to use as little water as possible for the cleaning. Make sure that no water is left on the surface after cleaning.

## All in one box...

- everything you need to clean and to rejuvenate your lacquered floor

Lacquer Care may be used for all lacquered surfaces and is especially suitable for the regular maintenance. Lacquer Care strengthens the lacquer as it protects against wear and scratches and hereby prolongs the lifetime of the lacquered surface. Lacquer Care does not build up a thick layer on the floor surface as the old layer is renewed with the next application.

Lacquer Soap is for regular cleaning of lacquered or painted surfaces as well as for surfaces of vinyl, tiles, linoleum, laminate etc. Lacquer Soap does not build a soap film and is therefore ideal for surfaces requiring frequent cleaning.
